

List of FS series scoreboards and their arrangements

The FS series scoreboards for sports are available in a wide range of models. Based on need, customers can choose to purchase only a single model, such as the main central scoreboard with scores and game time, or multiple models with the possibility of creating scoreboards as large as 730x340cm. The following image shows a 730x300cm scoreboard.

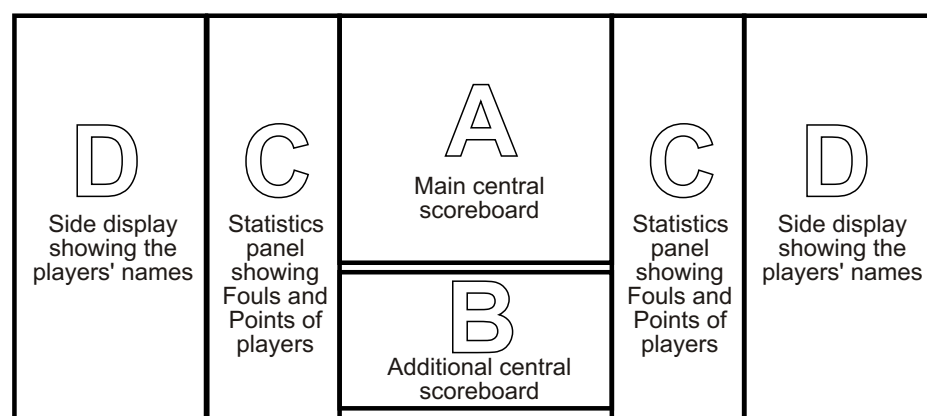

All scoreboard arrangements are commanded by a single control console (Console-320). Two additional consoles (Time-Console-02) can be connected to the Console-320 for game time and shot clock keepers.

More than one scoreboard, or arrangements of scoreboards, can be positioned in the same sports facility. For example, a scoreboard with side displays including individual player's fouls can be installed at one end of a court and at the other end another like scoreboard, or one without side displays, can be installed. Large 4-sided scoreboards (cube-shaped) can also be installed to hang in the center of the sports facility.

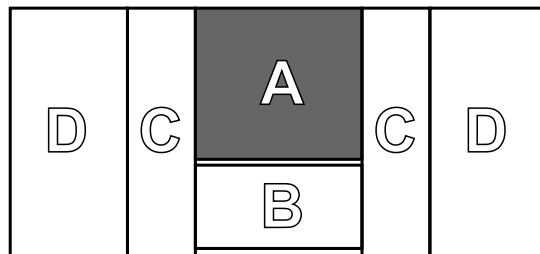

The various models available are listed below and divided into:

- A Main central scoreboard (team scores, game time, etc...)
- B Additional central scoreboard
- C Side displays for player number, fouls, and points for all players
- D Side displays showing all players' names
- E 24-30 second shot clocks
