

FS-24s-CONSOLE (Art.233-10)

Control console for FS-series 24- and 30-second shot clock panels.
Suitable for Basketball and Water Polo.

The **FS-24s-CONSOLE** is used only if the **Console-700** (art.308-01) is not at one's disposal. It is used for autonomously commanding only the 24-second **FS-24s-H20** shot clocks (for basketball) or the 30-second **KIT-FS-30s** shot clocks (for water polo). If used for commanding the **FS-24s-1/2/3** models, only the 24-second shot clocks will be visualized on these models, while the game time will remain switched off.

Technical characteristics:

- **Programming** of three times [0 ~ 99 s], of one warning of end time [0 ~ 99 s], and of the length of sound [0 ~ 5 s].
- **Managing times** via specific buttons. If you prefer to manage times via levers, add the article "**Time-Console-03**" (art.232-03). See ACCESSORIES.
- **Correction of time** made easier via specific buttons.
- **Panel horn**: can be activated manually or automatically at end time, with 5 volume levels that can be adjusted directly from the keyboard.
- **Brightness** of the panels can be adjusted to 4 levels directly from the keyboard.
- **Programmable counter direction** (forward-backward).
- **Alphanumeric display** of all the main information for easy management of the panels: time counter (seconds and tenths), counter direction, loaded time and programmed times, brightness, and horn volume.
- **Language** selection for programming menu: English, French, Spanish, Italian, German.
- **Highly reliable membrane keyboard**: 5 million operations per key.
- **2 serial data outputs**. Two connectors ensure operational continuity in case one of the 2 outputs fails.
- **Strong container** made from powder-coated aluminum.
- **Guarantee**: 2 years. ([info](#)).
- **Dimensions and weight**: 28.5 x 7.5 x 10.5cm, 1.3kg.
- **Power supply**: 12Vdc $\pm 10\%$, 200mA Max. This makes it possible to supply power to the console with a 12V external battery (see ACCESSORIES) or using the supplied power adaptor (100-240V) with the type of plug to be selected when ordering.

ACCESSORIES (not included):

- **Time-Console-03 (Art.232-03)**
This is a supplementary console that is small and economical, making it easier to operate the 24 second shot clock. Characteristics:
 1. Has 3 practical small control levers.
 2. 2m cable to connect with **FS-24s-CONSOLE**.
- **Rechargeable battery** (art.828-1)
Useful to power **FS-24s-CONSOLE** without having to be plugged into the main electrical grid. Typical duration over 180 hours.
- **Battery charger** (art.169) ... >> [Photo](#)
Required if you purchase the rechargeable battery.
