

CARDWRITER-01 (Art. 193-01)

RFID Programmer for prepaid cards, wristbands and key rings for CTx series timers.

The CARDWRITER-01 programmer allows for managing cards, wristbands and RFID key rings compatible with the CTx series timers.

The **TAGs** used (cards, wristbands, key rings) communicate with the programmer via radio waves (RFID technology) and store information such as the Credit and System Code.

A **large illuminated display with OLED technology** displays information **graphically**, ensuring easy use on part of the operator.

The CARDWRITER-01 programmer allows you to:

- **load** RFID TAGs with clients' prepaid credit;
- **verify** any remaining **credit** in the RFID TAGs;
- **zero** any remaining **credit** in the RFID TAGs;
- **verify totalizers** for loaded or zeroed credit;
- **format** the RFID TAGs;
- set and modify the **System Code**.

The CARDWRITER-01 programmer has two **menus**:

- the **operator menu**, used for normal management of cards (added and zeroed credit, etc.);
- the **administrator menu**, protected by a password, for managing the most important parameters (totalizers, System Code, etc.).
